

Organasm III 5.8 C2

The Organ Zion, N.P., UT

Approach: Directly across the river from the first turnout north of Weeping Rock. Distinguishable by splitter crack going through a HUGE roof. Cross Virgin River. Not recommended during periods of high water. Alternate approach involves crossing the Grotto Bridge and then following the hiker's trail for Angel's Landing until it begins to radically climb and switchback away from the river. An indistinct climber's trail will continue straight at first switchback. Trail will drop back down near the river. Allow 1 1/2 hours with gear if hiking from Grotto.

A great route to practice your thrash and dangle.

Descent: Rappel the route from the top of pitch 2, or walk off.

RACK:

- 1-2 sets of HB offsets
- 1 set of nuts
- 2 ea. black – yellow Aliens (or similar)
- 2-3 ea. #.5 – #.75 Camalots
- 2 ea. #1 Camalots
- 4-5 ea. #2 Camalots
- 1-2 ea. #3 – #4 Camalots
- cam hooks
